

Silvaflame-Cleervue Co Ltd

DRILL GUARD SV TYPE

DESCRIPTION

This Cleervue Drill Guard is made of 2mm Steel Bracketry with 5mm Polycarbonate visors making it very impact resistant.

The visor protects the operator from contact with the spindle, drill chuck and cutting bit before, during and after the drilling operation.

The guard is easily opened to the left, allowing quick bit changes.

Guards locks securely in place with a spin loaded clip or interlock.

The guard comes with mounting clips up to 100mm. The SV type has a visor depth of 150mm.

UNPACKING

Check for shipping damage. If damage has occurred, a claim must be filled with carrier. Check for completeness. Immediately report missing parts to supplier.

SAFETY RULES

Warning: for your own safety, read all of the instructions and precautions before operating tool.

Caution: always follow proper operating procedures as defined in this manual - even if you are familiar with use of this or similar tools.

Remember that being careless for even a fraction of a second can result in severe personal injury.

ASSEMBLY

The guard will come completely assembled ready to be fitted to your machine.

INSTALLATION

This guard attaches to the back pillar with a jubilee clip, so fitting is a very fast and simple job.

On the interlocked guards, the interlock needs to be wired into the machine by a trained professional.

Important: Check to be sure the clamp is tight and will not slide or rotate on the back pillar.

The visors should be replaced every 3 years and should be checked every day before use for signs of cracking or weakening.

Some coolants and cleaners are known to weaken polycarbonate so please check with your supplier before use.

OPERATION

This guard is easily used on many different jobs.

The guard opens easily with just a sprung knob on the left side.
